

Step 3)

Compile [Java](#) files (these files are present in directory **Final-MapReduceHandsOn**). Its class files will be put in the package directory

```
javac -d . SalesMapper.java SalesCountryReducer.java SalesCountryDriver.java
```

```
hduser_@guru99-VirtualBox:~/MapReduceTutorial$ javac -d . SalesMapper.java SalesCountryReducer.java SalesCountryDriver.java
/home/guru99/Downloads/hadoop/share/hadoop/common/hadoop-common-2.2.0.jar(org/apache/hadoop/fs/Path.class)
: warning: Cannot find annotation method 'value()' in type 'LimitedPrivate': class file for org.apache.hadoop.classification.InterfaceAudience not found
1 warning
hduser_@guru99-VirtualBox:~/MapReduceTutorial$
```

This warning can be safely ignored.

This compilation will create a directory in a current directory named with package name specified in the java source file (i.e. **SalesCountry** in our case) and put all compiled class files in it.
